SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled "Drug-Drug Interaction Assessment for Therapeutic Proteins." With the continued market growth and increased clinical use of TPs, it is important to understand the nature of and the potential for DDIs with these products. This guidance supplements the final FDA guidances for industry entitled "In Vitro Drug Interaction Studies--Cytochrome P450 Enzyme- and Transporter-Mediated Drug Interactions" and "Clinical Drug Interaction Studies--Cytochrome P450 Enzyme- and Transporter-Mediated Drug Interactions" (January 2020) by providing a systematic, risk-

based approach to determining the need for DDI studies for TPs. This guidance discusses considerations for assessing DDIs for TPs, including situations where determining the DDI potential of a TP is warranted. The guidance also discusses various types of DDI assessments, considerations for study design, and recommendations for labeling.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on "Drug-Drug Interaction Assessment for Therapeutic Proteins." It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

This draft guidance refers to previously approved FDA collections of information. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501-3521). The collections of information for submissions of investigational new drug applications, new drug applications, and biologic license applications in 21 CFR parts 312, 314, and 601 have been approved under OMB control numbers 0910-0014, 0910-0001, and 0910-0338, respectively. In addition, the submission of prescription drug labeling under 21 CFR 201.56 and 201.57 has been approved under OMB control number 0910-0572.
